SUMMARY

An Ambitious Mechanical Design Engineer with 2.8 years of hands-on experience in Designing and developing mechanical components and systems across various industries using a range of technologies. Seeking to secure an exciting position as Design Engineer.

EXPERIENCE

- ❖ **Associate I | Capgemini, Bengaluru, India.**
(Mar 22 – Present.)

SKILLS

- ❖ **NX Unigraphics v23**
- ❖ **Catia v5**
- ❖ **Solidedge**
- ❖ **PLM**

EDUCATION

- ❖ **Bachelor's Of Engineering in Mechanical | GEC, Raichur.(Jun 2021)**
- ❖ **XII | M. K. E. T., Harihar.(Mar2017)**

POSITION OF RESPONSIBILITY

- ❖ **Spec. Creation**
 - Developed comprehensive specifications for mechanical components using CAD software and an iPLM tool.
 - Defined detailed requirements, tolerances, and performance criteria to ensure optimal component design and manufacturing.
 - Contributed to the successful completion of spec creation projects, improving product quality and efficiency.
- ❖ **Taxonomy Classification**
 - Successfully implemented and maintained part classifications within a live iPLM environment(Enovia), classifying over 10,000 parts.
 - My expertise in Taxonomy classification improves data quality and facilitates efficient product development processes.

ACADEMIC PROJECTS

❖ **Designing and Fabrication**

The Manually operated eco-friendly road and floor cleaner can work very efficiently with respect to covering Area, Time and Cost of road cleaning process compared with the existing Machineries. Also it is Economical to use.

HOBBIES

❖ Travelling, Watching movies and Machine work.
