Location: Bengaluru, India - 560037

An ambitious Full Stack Developer with two years of experience in Designing & Developing applications and solutions using a range of technologies and programming languages. Seeking to secure an exciting position as a Full Stack Developer.

EXPERIENCE

Software Engineer | Capgemini | Bengaluru, Karnataka
MAR 2022 - Current

PROJECTS

- **Medical Healthineers**
  This application is designed to support hospital staff by providing easy access to equipment details. Developed to support hospitals, this app features detailed equipment information. Staff can easily order what they need. I am working on this project, addressing minor bug fixes. While debugging, I encountered a bug and fixed it by making some code changes.

- **Library Management System**
  To build a management system for the College Library, I developed both the backend and frontend using Java and Angular. I created a user interface with separate screens for managing books, issuing books to students, and viewing/editing/deleting data. These screens allow librarians to add new books, remove outdated ones, edit existing entries, and view data on issued books.

EDUCATION

- **Bachelor of Engineering,** *Govt. Engineering College.*
  Jun 2017 – Jun 2021 | Raichur, Karnataka, India.

SKILLS

- Java
- Angular 11+
